About

I am a UX/UI/Product designer from 2010. I have experience of team work in product companies and in IT agency. I specialize in UX/UI design of web-sites and interfaces in e-commerce and business area (such as pharmacy, realty estate, education, medicine, travel and online business platform). I have some experience of design ERP-systems.

In my work I use different research methods (UX) and visual erudition for creation of actual trend layouts (UI). I always reach to get new design trends by design courses, conferences and webinars, Telegram and YouTube design channels. Also I recorded few short courses for designers.

My goal is to work in an International Product company to design of complex interfaces and user experienced layouts.
