About

Recently back from Canada, I am currently looking for a new opportunity of work. I have worked as accessories designer for few years, more especially bags & small leather goods.

Rich from my previous experiences, I have acquired a certain autonomy and maturity, allowing me to integrate easily into a team. I am also able to work under high pressure and I am very organised.

I am persevering, rigorous, creative, and always smiling!

I have a lot of experience in Adobe Illustrator, Photoshop, and InDesign but also in some 3D software such as Rhinoceros, 3DSmax, or Solidworks. And I learn very quickly.

If you need further information, don't hesitate to contact me !
