About

The thing I love the most, working on AMAZING creating projects with AMAZING driven people. My background is multidisciplinary. I started with Video Game Design, then moved to Project Management where both taught me how a team of CREATIVES and TECH can come together to produce something meaningful.

Since, I have delivered over 30 projects as a sole design studio, crafting brand focused visuals and strategy for emerging businesses. Having closely managed all conversations, production and delivery on large scale client focused projects, I believe I offer great value as a creative team member or a freelance studio.

My story = Games -> Production -> Freelance -> Founder -> YOU
